▶ Shipment Preparation

Inserts must be packed and supplied without curls or tears and properly skidded with a minimum of cross-stacking. Please supply brick-stacked in 4-inch lifts. Bent corners and wrinkles should be avoided as they cause slowdown during binding. Any slowdown incurred due to poor packing is chargeable to the client. Inserts must be carton-packed with dividers between layers to avoid curling. Cartons should be crated on skids.

Inserts for multiple issues must be broken down on separate pallets or cartoned with specific quantities and labeled. They must also be properly identified on the packing slip so they can easily be broken down to avoid additional handling charges.
